# Policy 9.03

**Information Technology Policy**

Information Technology includes, without limitation, all computers, printers, scanners, networks, Internet portals, telecommunications equipment and lines, together with all other hardware and software owned or utilized by the College. Information Technology also includes any privately owned hardware or software which is connected to any of the College's computers, hardware, networks or telecommunications equipment. Use of these resources must be responsible, ethical, and in compliance with this College policy, state and federal laws, and all contractual obligations of the College and third parties. The Board of Trustees therefore authorizes the President to create, implement, and maintain procedures to support this policy.
