

Procedure 6.3001

Drone Operation of Unmanned Aerial Systems Within College Airspace Procedure

Any person seeking to fly an Unmanned Aerial System (UAS)—often called a “drone”—within college airspace, including College faculty, staff, or students, must obtain consent to do so by stating in a memo to the chief of the BCCC Police Department:

- Identification of the UAS;
- Name of and contact information for the UAS operator;
- A copy of the Remote Pilot Certificate of the UAS operator;
- Proposed location of the operator on the college campus during the flight;
- Purpose of the flight, e.g., engineering analysis, mapping, public relations, academic research, pilot training, hardware/software testing, preventive maintenance, and non-image-based data acquisition;
- Scheduled date and time of the flight;
- Duration of the flight; and
- Geographic range of the flight.

The chief of the BCCC Police Department will determine whether to grant consent and respond in writing within five business days of receipt of such memo.

Direct questions related to the daily operational interpretation of this procedure can be directed to the BCCC Police Department. Contact information can be found at <http://www.beaufortccc.edu/police/home>.
